

NeoLive

**POLYAMIDE 6 YARNS**

NeoLive

**Recycled Polyamide 6** Made from Pre-Consumer Waste When you manufacture a sustainable product, you start looking at everything from a different perspective. Nylon filament created throughout our process—even if it doesn't meet our high quality standards—never goes to waste. NeoLive nylon filament adds resilience and abrasion resistance to fabrics for everything from swimwear to lingerie to outdoor gear and hosiery. NeoLive nylon fiber can also have wicking, thermal comfort, and other performance technologies embedded in the fiber. To help take your sustainable products further.

1. At a first stage we select and adequate the reclaimed material from all the waste generated in our textile facilities.
2. Reclaimed material is remelted at our recycling units in order to obtain a recycled PA6 polymer.
3. Recovered polyamide polymer is extruded and made back into fibers at our spinning plant.

**Benefit:**

- Low Carbon
- Eco Friendly
- High Stretch
- Waterless Dyed
- Naturel Soft feel
- Recyclable
- Traceability

**Application:**

- Underwear
- Athlesure
- Yoga wear
- Swimwear
- Hosiery
- Sportswear
- Socs

**Available:**

FDY-DTY- ATY, AIR JET-COVERED (Single/Double Covered) Bright-Semidull- full dull ,Spun dyed – High Tenacity, Twisted – Melange  
FROM 0.5 TO 10 DPF FROM 8 TO 300 DTEX
