

**Polyamide & Polyester Melange Effect  
Yarns**

**Mélange -effect** DTY is a kind of specialty yarn made by using special textured technology and several different kind of raw material; Combining with Cation Dyeable yarn and other regular polyester, Polyamide yarns the fabric will show two or three tone special mélangé effects.

All effects enable the creation of yarns with different looks - with EGE and Marmara, the line is short and medium and while with Karadeniz and Marathon the melange feature is regular and longer, with a more pronounced shot effect.
